## Where In The World?

### A Physical Geography Scavenger Hunt for Ancient Egypt

Directions: Read each set of clues to determine which physical feature the clues describe!

Clue 1 --->	Clue 2 ---->	Clue 3 ----->	What physical feature am I? (write your answer in this box)
I am a long body of water.	I am North of the Nile Delta.	The Nile River empties into me.	
I am a long, narrow body of water.	I flow north, from Upper to Lower Egypt.	I am a river that is 4,160 miles long.	
I am a large, dry stretch of land.	I am West of the Nile River.	I am a desert that covers most of Egypt.	
I am a narrow body of water.	I am located East of the Nile River.	I am a sea.	
I am a triangular piece of fertile land.	I am connected to the north end of the Nile River.	I am a delta.	
I am a narrow, fertile strip of land.	I am located in the Nile Valley, in central Egypt.	I am the fertile land in Southern Egypt.	
I am a small body of water.	I am located West of the Red Sea.	I am the lake that is attached to the Nile River. I was created from a modern dam.	
I am a very thin strip of water.	I connect the Red Sea and the Mediterranean Sea together.	I am a canal.	
I am a hot, dry piece of land.	I am East of the Nile River.	I am a desert that is smaller than the Sahara.	
I am a fertile piece of land.	I am located North of the Nile.	I am the land in the north at the Nile's mouth.
